

# About Us

Experts in the transport of abnormal loads, Collett are your global professional partner for specialist logistics, heavy transport, heavy lift, marine and transport consulting services.

Our dedicated fleet of trucks, specialist trailers and Self-Propelled Modular Transporters (SPMTs) operate across our strategically placed Depots in Halifax, Goole, Grangemouth and Ireland, positioning us perfectly to provide the ideal solution for your project's requirements.

From single unit goods handling requirements, project cargo and one off deliveries, to the transport and heavy lift of multiple cargoes, the relocation of machinery or specialist logistics for complete breakbulk contracts, Collett are ideally placed to quickly and efficiently undertake your project.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*We understand that unique transport projects require unique transport solutions, that's why we are recognised globally as industry leading multi-modal heavy lift specialists*

**COLLETT**  
EXPERTS IN MOTION

- 1928** From his farm in Sutton near Keighley, Richard Collett (1) begins transporting his and other farmer's milk to the dairy by horse and cart.
- 1933** Richard Collett (1) buys his first wagon and is employed by the MMB to collect milk, then in cans, from farms to be delivered to the dairies.
- 1962** Richard Collett (2) moves to a farm near Wainstalls, Halifax.
- 1964** The partnership between Richard Collett (1) and his son Richard Collett (2) is formed, creating the firm R. Collett & Son. Over the following years the milk transport fleet increases to 14 wagons and, in the early 70s, expands into general haulage and heavy transport.
- 1975** R. Collett & Sons (Transport) Ltd is formed. Over the coming years, the five sons of Richard (2) join the company to fill various roles (Richard (3), David, Lincoln, Mark and Michael).
- 1985** Due to growth, the company obtains a two-acre site in Keighley and now operates from two sites allowing for the expansion of the heavy transport side of the business.
- 1998** Both Depots are consolidated on a five-acre site at Victoria Terminal, Albert Road in Halifax, which enables the company to provide heavy lift and warehousing facilities. Business in the transportation of wind turbines increases, while the consultancy side of the business is launched.
- 2008** Another strategically placed ten-acre Depot is obtained at Goole, which becomes the birthplace of the Marine Department. The Projects Department also expands, including a mobile 110 Tonne lift facility and extensive external storage.
- 2012** Our purpose built DVSA Testing Station is opened at our Halifax Head Office allowing us to maintain our fleet to the highest of standards whilst also offering a testing facility for others within the Yorkshire area.
- 2013** Halifax becomes home to our Training4Transport Centre of Excellence Facility, an approved centre for JAUPT Driver CPC Periodic Training, FORS Safe Urban Driving and HABC Health & Safety Management.
- 2014** Our Grangemouth Depot is opened, providing a strategic portside location equipped with a 110 Tonne mobile lifting gantry, whilst our Goole Depot becomes home to our newly acquired 550 Tonne capacity girder bridge.
- 2015** We introduce the Effer 205 Tonne/Metre crane and we welcome our SPMT power booster system.
- 2016** Collett Holdings Ltd is created with subsidiary companies for operational purposes, and the Collett Group join the Route To Space Alliance.
- 2017** We announce the launch of our new subsidiary company Collett (Ireland) Ltd. Our management systems across all three Depots become UKAS Accredited for ISO 9001:2015, ISO 14001:2015 and OHSAS 18001:2007 for the provision of transportation and lifting services to all industry sectors.
- 2018** We become the first in our sector to be awarded the ISO 45001:2018 Accreditation for our management systems.
- 2019** The company now employs over 150 people across four Depots and operates a diverse fleet of trucks and trailers. We provide all the expertise and equipment associated with transport, heavy lift, marine and transport consulting on a worldwide basis for the renewable energy, aerospace, power generation, environmental, heavy engineering, oil & gas and civil & infrastructure industries.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

# Compliance & SHEQ

A strong health & safety, environmental and quality culture is imperative to the welfare and well-being of our workforce, and it is our belief that this initiative will play a pivotal role in our aspiration to become truly industry leading in safety.

Our management systems are UKAS Accredited against ISO 9001:2015, ISO 14001:2015, ISO 14005:2018, ISO 27001:2013 and ISO 45001:2018 for the provision of transportation and lifting services to all industry sectors. These types of accreditations provide peace of mind for our customers.

We pride ourselves on our Compliance standards and the fact that our workforce demonstrates an impressive flexibility, an ability to cope with unexpected circumstances, a cooperative attitude and the utmost professionalism and dedication. Here at Collett we are constantly investing in people and developing the knowledge and skills of our workforce through our training & development program.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*We see it as critical that our people, and those who are affected by our activities, benefit from an incident-free environment. With these principals we demand the highest levels of SHEQ standards & commitment*

**COLLETT**  
EXPERTS IN MOTION

## Health & Safety

Our delivering safely, driving safety vision is; *To create and maintain an environment where care for our employees and those who work with us is our top priority, and the belief that all accidents are preventable prevails.*

## Quality

Our Quality procedures incorporate our desire to provide a perfect delivery for all our customers; this ensures we have a way of working to guarantee that our clients products are delivered on time and safety.

## Environmental

As a major international multi-modal logistics operator, we are clear in the leadership role that we must fulfil in driving forward our industry's health & safety sustainable environmental performance.

## Continuous Improvement

The adoption of our various management systems has been a strategic decision for Collett, a decision which helps us to improve our overall performance and provides us with a sound basis for sustainable development initiatives.

## Accreditations

Our Companies Management Systems are accredited against: Quality ISO 9001:2015, Environmental ISO 14001:2015, Health & Safety ISO 14005:2018, Information Security ISO 27001:2013 & Management Systems ISO 45001:2018 for the provision of transportation and lifting services to all industry sectors.

## Training4Transport

Providing specialist transport training, City & Guilds Escort Driver qualifications & Driver CPC courses for the heavy haulage & abnormal load industry.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

# Transport

Our years of experience coupled with our comprehensive fleet of specialist vehicles allows us to undertake all heavy transport and general haulage operations.

With our Head Office in Halifax, our portside locations in Goole and Grangemouth, and the addition of Collett Ireland, our Teams are ideally situated to respond quickly and professionally to your requirements. Our transport services are frequently integrated to encompass our heavy lift, warehousing & crane vehicle services providing a complete solution.

For smaller freight requirements our rigid and flat-bed vehicles, curtain sided vehicles with tail lift, flat trailers with twist locks & posts and retracting roof Euroliners are continuously used for general haulage.

Our customers are confident that we have the specialist equipment and expert knowledge to undertake the movement of abnormal loads and project logistics throughout Europe.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*As European heavy transport, heavy lift & general haulage experts we specialise in providing the ideal solution for freight, abnormal loads and oversized cargo*

# COLLETT

EXPERTS IN MOTION

## Heavy Transport

Abnormal loads & specialist logistics.

## Pilot Cars & Permits

Abnormal load escorts, pilot cars & transport permits.

## General Haulage

General freight, express delivery & distribution.

## Crane Vehicles

Lorry loaders for self-loading and offloading.

## Warehousing & Heavy Lift Storage

Indoor warehousing & outdoor storage.

# Heavy Transport

We understand that unique heavy transport projects require unique transport solutions, that's why the Collett Team operate globally to provide bespoke heavy transport logistics and heavy lift services for abnormal loads and oversized cargo.

Our Teams meticulously plan and execute complete specialist logistics, successfully delivering your cargo on time, on budget and most importantly, adhering to the highest safety standards. We pride ourselves on the excellent service we offer and the professionalism of our Teams.

Utilising our specialist fleet of trailers, SPMTs, crane vehicles, hydraulic heavy lift equipment and heavy haulage tractor units, we have the specialist resources to meet your requirements.

Alongside our transport services, we also operate our own fleet of pilot cars which will escort your cargo, allowing us to provide a complete logistics solution and ensure a safe and compliant abnormal load transportation.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*Collett are your leading haulage logistics specialist, experts in the transport of abnormal loads. Whatever your cargo, we have the transport solution!*

To ensure every project we undertake is completed to the highest standards, our Permits Team liaise directly with police escorts and local authorities to ensure all necessary notifications and Highways Agency "Water Preferred" documentation is in place for the movement of your cargo.

Our transport services are frequently integrated to encompass all associated heavy lift requirements, including crane hire, hydraulic jacking & skidding and contract lift services to provide complete abnormal load logistics. Additionally our Consulting Team can plan your movement with great precision, whilst our Marine Department can organise any shipping and chartering requirements for your cargo.

All this combined allows us to skilfully undertake any abnormal load project expertly managing complete logistics from concept through to completion.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

**COLLETT**  
EXPERTS IN MOTION

# Pilot Cars & Permits

Our fleet of Code of Practice pilot cars provide nationwide abnormal load escort services guaranteeing a safe and compliant delivery, whilst the Collett Permits Team ensure the required notifications are in place for the movement of your cargo.

Our Escort Drivers are qualified to City & Guilds standards:

- Level 2 Certificate Abnormal Loads Escort Driver
- Level 3 Certificate Abnormal Loads Escort Manager

In addition to this, our Permits Team work closely with our Heavy Transport Department to prepare permits and notifications for every abnormal load project we undertake.

*Our abnormal load escort vehicles provide pilot car services for all our heavy transport projects nationwide whilst our Permits Team ensure all necessary notifications are in place*

# COLLETT

EXPERTS IN MOTION

Our Team prepare all the necessary notifications for third parties including abnormal load permits, BE16 Special Order and VR1 permits. This service includes liaison with police escorts, local authorities and the inclusion of Highways Agency "Water Preferred" documentation where required.

Our fleet of pilot cars comply with the Highways Agency's Self-Escorting of Abnormal Loads Code of Practice. Coupled with this, our qualified workforce allows us to skilfully and safely escort any abnormal load throughout the UK.

With meticulous planning in place ahead of each and every heavy transport project, our Team liaise with and arrange all police escort duties and requirements as demanded by the Police Authorities.

# General Haulage

Our dedicated fleet of general haulage vehicles are engaged to carry out daily, weekly and monthly distribution contracts across the UK and Europe. Our fleet is available for spot hire and rapid response express delivery. We also operate a full load, part-load and groupage service throughout the UK with access to the pallet network.

- Sprinter vans
- Rigid flat beds & curtain siders
- 45' flat beds
- 45' curtain siders & Euroliners (retracting roof)
- 45' extendable rear steer trailers
- Twist lock trailers
- Large headboards for the construction industry
- Side protection & pins

All our Depots feature storage and warehousing facilities providing a cargo handling and de-vanning service. In addition, our Halifax Depot operates a calibrated weighbridge facility up to 100 Tonnes to conform with the SOLAS containerisation regulations.

*We pride ourselves on offering our general haulage fleet for standard transport, spot hire, express delivery & distribution facilities throughout the UK, Ireland and Europe*

All our vehicles are equipped with satellite tracking systems and digital communications providing our Traffic Office and our customers with real-time and historical travel information. This tracking ensures that we can follow the entire journey of your cargo from collection, through to transport, distribution and final delivery providing up to date progress information and an accurate time of arrival.

The expertise, experience and equipment across our general haulage operations allows us to provide a 24/7 complete rapid response transport solution.

# Crane Vehicles & Lorry Loaders

Our heavy lift crane vehicle & lorry loader fleet features front and rear mounted cranes with lifting capacities ranging from 9 Tonne/Metre to 205 Tonne/Metre. These vehicles all meet BS7121 Part 4 regulations.

All our Crane Vehicle Operators are trained and certified, ensuring maximum safety when undertaking your lifting requirements.

Our ALLMI (*Association of Lorry Loader Manufacturers and Importers*) certified Drivers are highly experienced and skilled in self-loading and offloading freight and machinery. This allows us to safely and efficiently undertake lifting and positioning tasks without the need for hiring mobile cranes or fork trucks.

These cranes are mounted to artic tractor units and front & rear mounted to rigid vehicles which provide the ideal solution where space may be restricted.

**COLLETT**  
EXPERTS IN MOTION

For complex lifts, as defined in BS7121 Part 4 (*Safe Use of Cranes*) we provide qualified Appointed Persons (APs), Slinger Signallers and Crane Supervisors to plan and execute lifting operations. This service also incorporates the supply of RAMS (*Risk Assessments and Method Statements*), lift plans, calculations and other required documentation.

Working alongside our general haulage and heavy transport operations, the addition of our crane vehicles allows us to provide a heavy lift loading, offloading and flexible delivery solution. Furthermore, our Projects Team provide engineering calculations and planning for complex lifting solutions tailored specifically to each individual project.

The largest lorry loader in our fleet comes in the form of the Effer 2055. The largest of its kind in Europe, the Effer 2055 205 Tonne/Metre crane offers a powerful weight to ratio performance.

*Crane vehicles & lorry loaders are an essential part of our general haulage and heavy transport operations providing our customers with a flexible delivery solution*

# Warehousing & Heavy Lift Storage

Our indoor warehousing and outdoor storage facilities can accommodate long and short term requirements or can simply be used as a holding area for abnormal loads awaiting onward transport or shipment.

Our 5-acre Halifax Depot offers 40,000sq ft of warehousing space alongside container de-vanning, load securing and lashing, a purpose built docking area and a variety of forklift truck capacities up to 15 Tonne. Halifax also operates a calibrated weighbridge facility up to 100 Tonnes to conform with SOLAS containerisation regulations.

Our 10-acre Goole Depot offers 20,000sq ft of indoor warehousing, substantial outdoor storage, a 45 Tonne reach stacker and range of forklift trucks up to 28 Tonne capacity.

Our strategic 3-acre portside Grangemouth location provides a cost effective storage or transhipment solution and features a range of forklift trucks with lifting capacities of up to 15 Tonnes.

We also operate a range of flexible warehousing solutions, including block stacking and pallet racking.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*Our Depot in Halifax, and our two portside locations in Goole and Grangemouth all offer heavy lift storage & warehousing facilities*

**COLLETT**  
EXPERTS IN MOTION

Each Depot features specialist heavy lift equipment including 110 Tonne straddle carriers and overhead gantry cranes, providing the ideal solution for storage and transhipment operations.

Halifax features an internal modern heavy lift storage facility equipped with two overhead gantry cranes with lifting capacities of 30 and 32 Tonne. Our premises also offers the opportunity for test builds, complete with handling facilities and auxiliaries.

Our portside Goole Depot features a 110 Tonne straddle carrier, a 45 Tonne capacity container handler/top lift and up to 28 Tonne FLT equipment.

Our Scottish headquarters in Grangemouth features 110 Tonne and 45 Tonne straddle carriers and range of forklift trucks up to 15 Tonne.

All Depots are fully fenced, equipped with 24 hour CCTV coverage and have security guards in operation for maximum safety.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

# Heavy Lift

Undertaking all lifting responsibilities our in-house Appointed Persons (APs), Slingers, Banksmen and Crane Lift Supervisors, operating under CPA Contract Lift Conditions, provide bespoke heavy lift services directly tailored to our client's requirements. Coupled with this, our Team provide all the necessary surveys, drawings, lift plans, method statements and risk assessments to ensure a safe operation at all times.

Where crane hire is not a suitable option we operate a hydraulic lifting gantry system, whilst our jacking & skidding systems and Self-Propelled Modular Transporters (SPMTs) provide the ideal solution for moving and positioning within restricted areas.

For projects which require consolidation facilities, our Depots at Halifax, Goole and Grangemouth all offer heavy lift storage facilities equipped with gantry cranes, straddle carriers and container handler/top lift equipment.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*With our range of lifting equipment, engineering services, hydraulic jacking & skidding, crane hire, contract lift and SPMT operations we safely undertake all industrial services for abnormal loads*

# Engineering & Project Management

We understand that unique projects require unique transport solutions, that's why our Engineering & Project Management Team work in conjunction with all our other departments to engineer complete logistics.

Our Team will manage your project entirely from initial engineering studies, detailed calculations and specialist reporting through to final delivery.

Our in-house qualified Mechanical Engineers propose and produce engineering drawings, including geometrical tolerancing to BS8888:2017 standards, and working under CDM2015 regulations to BS5975:2018 standards for temporary works.

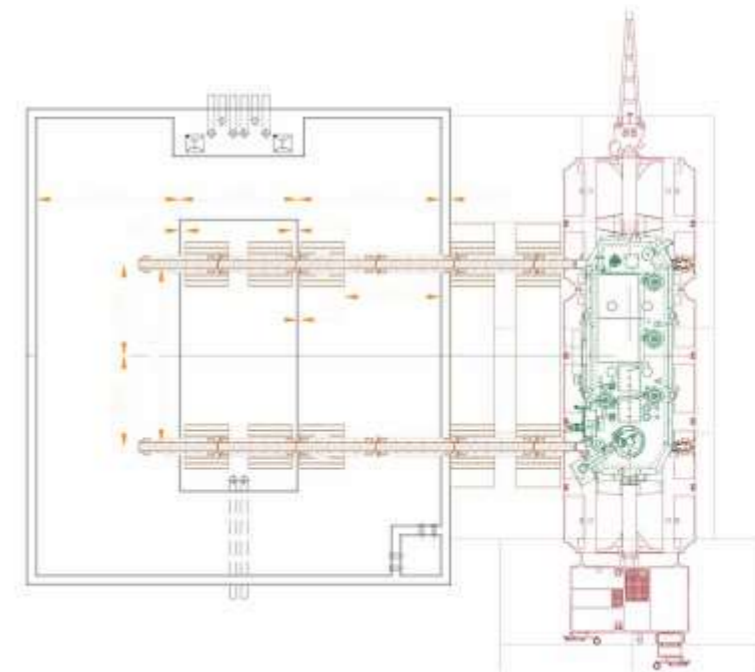

We also follow EN:1990, EN:1991, EN:1992 and EN:1993 and the British National Annex for the design of any bespoke solutions.

As part of our service you will be allocated a dedicated Project Manager who will oversee these requirements and co-ordinate the entire project. Including full route assessments, specialist reporting and swept path analysis (where required), ahead of the movement taking place.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*From single unit projects to complete breakbulk contracts, our Engineering Team provide complete heavy transport & heavy lift logistics for abnormal loads and oversized cargo*

**COLLETT**  
EXPERTS IN MOTION

Calling directly upon our diverse fleet of specialist trailers and Self-Propelled Modular Transporters (SPMTs) our Project Management Team provide complete transport logistics tailored specifically to your needs. We also carry out loading and offloading operations by hydraulic gantry, jacking & skidding or by mobile crane under CPA Contract Lift Conditions. This includes the production of risk assessments, method statements and lifting plans as part of this comprehensive management service.

This includes all permit applications and escort requirements for land based abnormal load transport. Our Team will liaise with police, local authorities, electricity & telecoms providers, structure owners and rail & highway authorities.

We possess years of proven experience in devising new and innovative ways to transport abnormal loads. From tanks to transformers, and aeroplanes to engines, we have the knowledge and expertise to engineer a solution to directly meet your requirements.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

# Industrial Services Jacking & Skidding

Utilising our specialist jacking & skidding equipment our Heavy Lift Team can ensure that no matter what the environment we can safely and securely undertake the transport and load positioning of machinery & industrial cargoes.

In restricted environments crane hire is not always a suitable option. Utilising our specialist hydraulic jacking & skidding systems, Collett Engineers have the ideal solution for these confined spaces, providing a lifting and load positioning service in areas where traditional transport arrangements may not be a suitable option.

We operate a multi-functional synchronous hydraulic heavy lift system capable of monitoring the position of the load between the four jacks to within a 1mm tolerance. This innovative hydraulic jacking & skidding equipment allows us to raise and slide industrial machinery, transformers and components up to 500 Tonnes in a controlled manner, indoors or outdoors. With the option to pull, push, lift and lower, we can load directly to trailer or relocate industrial machinery in confined spaces.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*Our dedicated Team of Engineers have the knowledge and expertise required for machinery extraction, jacking & skidding and the relocation of industrial cargoes in confined and restricted environments*

**COLLETT**  
EXPERTS IN MOTION

Often used for the extraction or positioning of transformers within industrial environments, our jacking & skidding systems provide the perfect solution for machinery movements where more traditional transport or Self-Propelled Modular Transporter (SPMTs) arrangements are not achievable.

Utilising these specialist hydraulic systems our Engineers can gradually raise loads to an optimum height to allow for the installation of modular skidding systems, featuring hydraulic push-pull units and low-friction skidding pads. Once in place, these systems effortlessly facilitate the movement of industrial cargoes.

Where applicable all technical documentation, risk assessments, method statements and engineered calculations will be provided by our in-house Team.

With the skills, expertise and equipment at our disposal our Heavy Lift Team can provide the ideal solution for moving heavy industrial objects, factory relocations, extractions and machinery movements.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

# Crane Hire & Contract Lift

Our Heavy Lift Engineers and Appointed Persons (APs) deliver bespoke lifting solutions for your cargo. Our in-house Appointed Persons, Slingers, Banksmen and Crane Supervisors can provide mobile crane solutions, including telescopic mobiles to up to 1,000 Tonnes and crawler cranes up to 2,000 Tonnes. We plan, order and supervise all cranes needed, from simple single and multiple lifts, up to complex tandem operations.

Our Heavy Lift Team have the knowledge and experience of all aspects of lifting operations, allowing us to carry out these tasks adhering to BS7121 Safe Use of Cranes Code of Practice. This enables us to propose, engineer and deliver lifting solutions tailored specifically to each individual project.

Our Team will assume the responsibility for all heavy lift operations, preparing plans, studies, risk assessments, method statements and providing the required insurance where agreed. Operating under CPA Contract Lift Conditions, our Team will hire the necessary crane equipment to safely load, position and deliver your cargo.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*Drawing on our longstanding relationships with crane operators, our crane hire and contract lift services provide an integrated lifting solution for your cargo*

# COLLETT

EXPERTS IN MOTION

Under the Construction Plant-Hire Association (CPA) Crane Rental Conditions the client is responsible for supplying all necessary lift plans, Appointed Persons, Slingers, Banksmen and insurance. On behalf of our clients, and with our established crane supplier relationships, we can provide crane hire on a rental basis as an integrated package with our transport operations.

By utilising our crane hire services, our clients understand that they hold the responsibility for providing approved operators to undertake their lifting operations. Alternatively, these crane hire services can be provided in conjunction with our contract lift services offering a complete solution.

Whether it's manoeuvring machinery within a confined space, loading heavy cargo to an awaiting vessel, relocating transformers or positioning loads, our Team can provide an integrated solution.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

# SPMTs

The unique 360 degree manoeuvrability of SPMT trailers allows our Team to undertake intricate transport and positioning of abnormal loads and heavy cargoes.

SPMTs are platform vehicles with hydrostatic driven axles, and regularly feature in our heavy transport and heavy lift operations providing an essential addition when undertaking the movement of transformers, vessels, tanks and industrial cargoes.

The versatility of Self-Propelled Modular Transporters allows them to be coupled in a variety of combinations providing a tailored transport solution for your cargo requirements.

The unique hydraulic capabilities provide the ability to self-load and offload heavy cargoes with a programmable steering option allowing multiple steering geometry patterns.

Due to the scalability of SPMTs we are capable of transporting 2,000 Tonne payloads.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*Our fleet of hydraulic Self-Propelled Modular Transporters (SPMTs) are the ideal solution for manoeuvring cargo in confined spaces and intricately positioning loads*

Our SPMT fleet is enhanced with the addition of the power booster system, which attaches to any modular trailer combination, allowing us to effectively change the complete vehicle traction and pulling power capabilities. This is the equivalent to an additional ballast tractor being connected.

Used predominantly for working on site, installations, portside positioning or RoRo operations, our hydraulic Self-Propelled Modular Transporters offer a flexible alternative to more traditional transport methods.

Coupled with our hydraulic jacking & skidding systems we can successfully undertake transport and positioning operations in challenging environments.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

**COLLETT**  
EXPERTS IN MOTION

# Marine

We have the experience and knowledge in the shipping of cargoes across a varied selection of sea, river or canal-going vessels and are active in the chartering markets, from project cargo and heavy lift pieces, through to shipping industrial cargoes. This includes barge and pontoon operations and feeder services from the UK to Antwerp, Rotterdam and Hamburg.

Collett has an established reputation and well-developed relations with both charterers and vessel owners, with the ability to match cargoes to vessels and provide chartering services effectively and in a timely manner.

Our state-of-the-art heavy lift capabilities are ideal for project and bulk cargoes, and our portside heavy lift storage facilities in Goole and Grangemouth offer significant space for project and bulk cargo awaiting assembly, delivery or shipping.

Knowledge gained via years of working with and through ports worldwide, alongside a proven track record of high quality marine services, transport and shipping solutions gives Collett the edge your business requires.

RENEWABLES • AEROSPACE • POWER GENERATION • ENVIRONMENTAL

*The in-house expertise within our Marine Services Division allows us to carry out all ship's agency, shipping and vessel chartering activities for breakbulk and project cargo worldwide*

# COLLETT

EXPERTS IN MOTION

## Ship's Agency

Our Marine Services Team provide complete multi-modal solutions utilising sea, river and canal going vessel shipments.

## Vessel Chartering

From breakbulk, project cargo and heavy lift through to industrial quantities of base commodities.

## Ports & Stevedoring

Complete management of your cargo, covering all ship's discharge and heavy lift services across all UK ports.

## Port Operation

Collett Marine & Shipping Teams liaise directly with major port operators on a daily basis.

OIL & GAS • HEAVY ENGINEERING • CIVIL & INFRASTRUCTURE

# Consulting

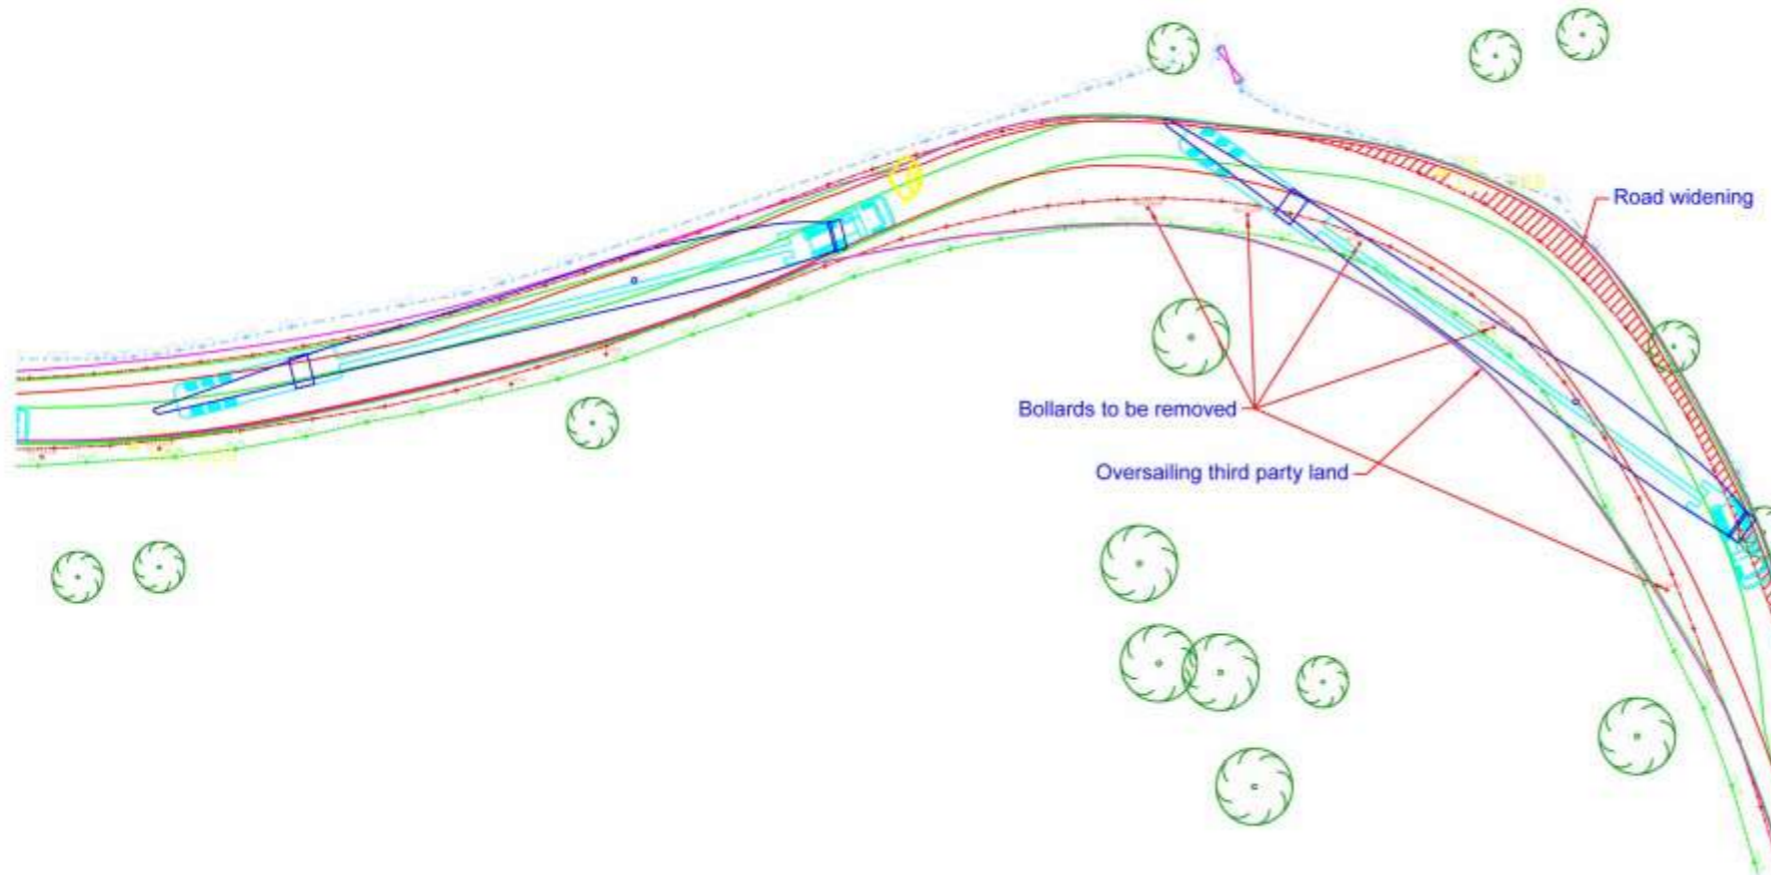

Possessing detailed knowledge of our specialist tractors, trailers and SPMTs, we apply the practical transport considerations of abnormal load vehicles when planning each movement. Our Team understand the behaviour of abnormal load vehicles and have extensive knowledge of transport regulations, environmental considerations and route planning requirements.

Once a route has been proposed, our Team undertake test drives, simulating the correct loaded dimensions, to assess the suitability of a route. With meticulous knowledge of each trailer in our fleet, our Transport Consulting Team can accurately plan each stage of your project.

For heavy transport projects we routinely undertake these detailed planning exercises and specialist reports including route access surveys, 2D & 3D swept path analysis, topographical surveys, traffic management planning, visual route inspections and environmental impact assessments. The provision of these specialist reports allows us to identify the ideal route for your cargo.

*Our Team of Transport Consulting Professionals analyse the impact of abnormal loads providing specialist reports and intricate route planning for all our heavy transport projects*

## Swept Path Analysis

Detailed 2D & 3D swept path analysis and specialist reports.

## Test Drives

Establish route suitability, modifications and enabling works.

## Traffic Management Plans

Our Transport Consulting Team apply and manage all TTRO requirements.

## Route Access Surveys

Providing different levels of reporting for road access.
